Experience

Nimbly Technologies

April 2024 – Present

Software Engineer

Bangalore, Karnataka

- Built and deployed a multi-tenant AI chatbot platform (Python/TypeScript) using LLM agents for natural-language query generation, contextual conversation memory, and intelligent data retrieval; live in production across multiple organizations.
- Architected event-driven workflows across a distributed microservices backend using GCP Pub/Sub, powering core platform modules — Inventory Management, Asset Tracker, and Bulk Operations.
- Re-architected the bulk operations system using the SAGA pattern, implementing compensating event flows over Pub/Sub to guarantee atomicity and fault tolerance in a previously inconsistent distributed workflow.
- Owned a zero-downtime migration of the Gallery module from MongoDB to PostgreSQL — kept both stores in sync via a pgmq-backed job sustaining 500 req/sec into Supabase, with connection-pool and config tuning on a low-tier instance, so users saw no interruption during cutover.
- Migrated 16+ backend microservices from deprecated Gen1 Cloud Functions to direct Cloud Run — reworking readiness probes, multipart upload streaming, and inter-service and Cloud Tasks callback routing.
- Designed and built Asset Tracker from scratch in Go — QR-based asset identification, automated audit workflows via REST APIs, and analytics dashboards for maintenance cost and ownership tracking; deployed to production with early enterprise customers.
- Improved developer experience and release velocity across shared services, enabling one-click deployments and diff-based CI/CD pipelines for repositories with multiple Firebase functions.

Crio.Do

January 2024 – April 2024

Project Engineer

Bengaluru, Karnataka

- Developed robust backend projects with Java and Spring Boot, employing Test-Driven Development (TDD) and writing unit tests with Mockito.
- Guided students through debugging and technical issues, resolving tickets to enhance learning outcomes.

Tata Consulting Engineers

December 2021 – April 2022

Software Development Intern

Bengaluru, Karnataka

- Designed and implemented web forms that streamlined workflows by providing users with project specification documents and inventory requirements using ASP.NET and C#.
- Developed libraries using OpenXML SDK to automate creation of reports from templates for multiple projects.

Education

St. Joseph's University

July 2022 – April 2024

Masters of Science in Computer Science

Bengaluru, Karnataka

St. Joseph's College (Autonomous)

July. 2019 – July 2022

Bachelors of Science in Computer Science, Mathematics and Physics

Bengaluru, Karnataka

Technical Skills

Programming Languages: TypeScript, Java, Python, SQL, Go, Shell

Databases & Tools: PostgreSQL, MongoDB, Redis, Git, Docker, Claude/ Codex, Firebase, Jest, JUnit

Frameworks & Libraries: Node.js, Spring Boot, Django, Flask, React, React Native, Redux, Prisma

Cloud & Others: AWS, GCP, Terraform, REST, GraphQL, Kafka, CI/CD, Agile, Linux, Gen AI

Projects

QShare | *Go, Cobra, NaCl/AES-GCM, ECDH*

December 2025

- Peer-to-peer encrypted file transfer CLI; features end-to-end encryption, one-time pairing codes, chunked transfer with integrity checks, and a relay server fallback for NAT traversal.

Job linkup | *Flask, Bootstrap, AWS, Terraform*

November 2023

- Designed a job portal with secure payment integration using Razorpay APIs, deployed on AWS with Terraform-managed infrastructure.

Certifications

AWS Academy Graduate – *AWS Academy Cloud Foundations*

November 2023

Scrum Fundamentals Certified – *SCRUMstudy*

January 2023
